

What is Telemedicine?

Telemedicine allows you to see a Le Bonheur provider at a clinic close to home.

What can you expect in a telemedicine appointment?

- You will be escorted to a patient room just like any other visit.
- It is in real time. You will see the provider on a large screen in the Le Bonheur clinic, and the provider will see you on a large screen at our main campus.
- The provider will be able to treat you as they would during an in-person visit.
- There will be a nurse present during your entire visit to assist.
